Software Testing Skills

Testing Proficiency:

- Strong Knowledge in SDLC, STLC and Defect/Bug Life Cycle.
- Knowledge of Agile model and Waterfall model.
- Knowledge of Test Plan, Traceability Matrix.
- Knowledge of White Box, Black Box, Gray Box Testing.
- Knowledge of writing, reviewing and executing Test Cases.
- Knowledge of Functional Testing.
- Knowledge of Smoke, Regression and various other types of Testing including Database and GUI Testing.

Projects

BE – Project :

- **Fuze Card** – The Project Fuze Card was designed on the idea of storing the multiple users card onto the single hardware. In this project we tried to achieve the same thing with the idea of storing the number and displaying the information linked to those numbers. The information linked to those stored number can also be accessed on Android Application which is connected to the hardware with help of Bluetooth Module. The Android Application is developed with “ Basics For Android ” i.e vb.net Programming.

Diploma – Project :

- **Intelligent Helmet** – The main purpose of the project Intelligent Helmet is to make awareness about the importance of wearing helmet while driving. The project Intelligent Helmet is about wearing the helmet without which the bike will not start and it will also help to detect if the person is drunk or not and if accident happens it will send message to the registered mobile number.
